

# Explorations Newsletter

## February - March 2010

## New Content Additions eLibrary Elementary

### New magazine periodicals added

We've added new kid-friendly titles to your eLibrary Elementary magazine collection

- **National Parks:** This quarterly profiles the historical and natural wonders of U.S. National Parks
- **New Moon Girls:** New Moon Girls is an inspirational magazine for girls ages 8 to 12 to engage in self-discovery, creativity, and community.
- **Read:** A children's classroom magazine for grades 6-10, published by Weekly Reader Corporation
- **Resource Links:** Canada's national journal devoted to the review and evaluation of Canadian English and French resources for children and young adults.

### World Book Science Year addresses profound questions

World Book Science Year is a concise, respected reference annual offering accurate information on a range of popular science topics. A compilation of World Science Year entries from the Sixties to the present have been added to eLibrary Elementary. Samples:

[How Genes Cause Disease](#)  
[Chronic Inflammation: Pathway to Disease](#)

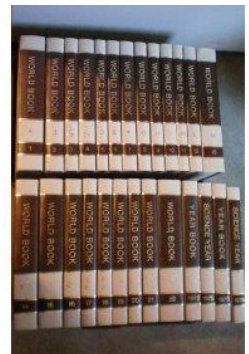

[Why Species are Important](#)

[How the Oceans Came to Be](#)  
[Why Do We Age and Die?](#)

[Good Hair Days: A Case of Good Chemistry](#)

[How Cellular Phones Work](#)  
[What Makes Paint Stick?](#)

[Using Cancer to Fight Disease](#)

## **World Book Year Book entries provide primary source documents**

Over 27,000 entries from the archives of the World Book Year Book provide students with documents that support “decades” and similar historical research assignments. These primary source additions give students great historical context on subjects as diverse as Art through Zoology. The year by year approach allows students to trace the evolution of a field of study, organization or nation. Below are a few samples:

[Space Exploration \(1969\)](#)

[Civil Rights \(1954\)](#)

[Computer \(1981\)](#)

[Recordings \(1964\)](#)
